

Flexoprin Explained

Bursitis Explanation

What is bursitis?

Bursitis is the inflammation or irritation of the bursa. The bursa is a sac filled with lubricating fluid, located between tissues such as bone, muscle, tendons, and skin, that decreases rubbing, friction, and irritation.

Symptoms of Bursitis

Flexoprin quickly relieves symptoms of bursitis like...

- Persistent pain
- Lack of mobility
- Swelling around the affected areas
- Warm and redness around the areas that hurt the most

What is Flexoprin?

This one of a kind FDA registered drug is originally formulated for symptomatic relief of bursitis. Speed the healing of your symptoms from the inside with just two pills once daily and control rare outbreaks of pain. This specific design has been formulated to relieve you of any symptoms that may occur while having bursitis.

How Flexoprin Works

1 in the morning Your first dose of the day has been specially created to help protect and boost your body's ability to fight off inflammation with a remarkable combination of potent botanicals. In addition, your morning dose will give you the energy your body needs to get better fast.

1 at night In the evening, you take the second dose which has been designed to help you attack your pain 24 hours a day. As you double-up, you're allowing your body to get busy working on getting better even while you're asleep.

Product Type: **Capsule**

Bottle Description: White round pharmaceutical

Capsule Count: **90**

Directions: Take two capsules every morning and one capsule each night approximately one hour before bedtime, or as directed by a healthcare practitioner. Be sure to stay on the dosage schedule, as this increases the effectiveness of Flexoprin.

WARNINGS: If you have any illnesses, are pregnant, nursing, or are taking medication, please contact your healthcare professional before using this product. Tamper-resistant package, do not use if inner seal is missing. Do not exceed recommended dosage. If negative reaction occurs, discontinue use immediately. Keep this and all medications out of reach of children.

Frequently Asked Questions

Q: What is bursitis and what causes it?

A: Bursitis is characterized by swelling, aching, stiffness, redness, pain, pressure, and inflammation of a joint. While the main cause of bursitis is unknown, it is often attributed to stress, overuse, or trauma.

Q: How does Flexoprin™ help?

*A: The ingredients in **Flexoprin™** work to alleviate pain, inflammation, soreness, and other symptoms of bursitis. These ingredients are specially formulated to help ease the discomfort you are feeling because of your bursitis.*

Q: How much Flexoprin™ do I have to take and how long do I have to take it?

*A: To reach optimal results with **Flexoprin™**, take one capsule every morning and one capsule each night approximately one hour before bedtime, or as directed by a healthcare practitioner.*

Q: I am pregnant/nursing. Can I take Flexoprin?

*A: No. Do not take **Flexoprin™** if you are pregnant or nursing as there has been little research done as to the affects of the ingredients in **Flexoprin™** on women who are pregnant or nursing. Therefore, we suggest you wait until you are no longer nursing to begin taking **Flexoprin™**.*

Q: What if Flexoprin™ doesn't work for me?

*A: **Flexoprin™** has worked for thousands of people, it CAN work for you or we take all the risk. If for any reason within a full year you feel like our product did not meet 100% of your expectations, simply return it for a refund. Even up to the last day of the 12th month, period.*
